

SUN AND SHADE BLEND

Best choice for shady lawns. A dark green, fine textured blend that's soft underfoot.

Premium quality. Suitable for shaded locations. Great for under trees or near fences and buildings. A clever combination including Creeping Red Fescue, one of the most shade tolerant varieties. Also includes Kentucky Bluegrass for deep blue-green colour, this lawn establishes quickly. Ideal for oversowing all lawns including Buffalo.

Germination:
Very Fast, 7-10 days

Fine leaf (<3mm)
Deep green colour

New Sowing: 3-4kg per 100m².
Oversowing: Use half sowing rate.

Lawn Sowing Instructions:

PREPARE YOUR SOIL

Clear the area of weeds and debris. Improve drainage by digging or aerating. Level the ground. If the soil is poor quality bring in lawn soil (sandy loam) from a local soil supplier.

FERTILISE

Apply starter fertiliser to the soil (up to 48 hours before or same day as sowing) and water it in. Use Landscape Range KickStart Fertiliser at a rate of 3kg per 100m². Water well.

SPREAD SEED EVENLY

Use the sowing rate recommended on the pack. Dividing the area and the seed into the same number of parts will help you spread them evenly. Gently rake to ensure good seed to soil contact.

WATERING

For the best outcome, maintain a consistently damp seedbed for 3 to 4 weeks using a fine spray to prevent seed movement. Avoid letting it dry out as germination will slow.

Lawn Maintenance Guide:

Fertilise twice in Autumn and twice in Spring

First mow: When well established at around 40-50mm height. Take off only the tips for the first few mows.
When fully established mow regularly and avoid removing more than one-third of the leaf at a time.

Avoid mowing during the heat of the day in summer to prevent stressing your lawn.

Ideal Sowing Times:

Northern NSW,
Queensland,
Northern WA, NT

Autumn, Winter,
Spring.

Victoria, NSW, ACT,
Western Australia,
South Australia,
Tasmania

Autumn, Early Winter,
Spring.

This blend requires regular deep watering in Summer to stay green.
