

SUPREME GREEN BLEND

A stunning, hard-wearing lawn with 70% drought tolerant Tall Fescue.

Turf Type Tall Fescue  70%

Turf Type Perennial Ryegrass  30%

An attractive, durable lawn with a rich green colour and outstanding performance. Made with 70% Tall Fescue for excellent drought tolerance and 30% Perennial Ryegrass for superior wear resistance, this blend establishes quickly to create a stunning lawn that stands up to challenging seasons.

Ideal Sowing Times:

Northern NSW,
Queensland,
Northern WA, NT

Autumn, Winter,
Spring.

Victoria, NSW, ACT,
Western Australia,
South Australia,
Tasmania

Autumn, Early Winter,
Spring.

This blend requires regular deep watering in Summer to stay green.

Germination:
Very Fast, 8-10 days

Fine - med leaf
(3 mm)
Deep green colour

New Sowing: 4-5kg per 100m².
Oversowing: Use half sowing rate.

Lawn Sowing Instructions:

PREPARE YOUR SOIL

Clear the area of weeds and debris. Improve drainage by digging or aerating. Level the ground. If the soil is poor quality bring in lawn soil (sandy loam) from a local soil supplier.

FERTILISE

Apply starter fertiliser to the soil (up to 48 hours before or same day as sowing) and water it in. Use Landscape Range KickStart Fertiliser at a rate of 3kg per 100m². Water well.

SPREAD SEED EVENLY

Use the sowing rate recommended on the pack. Dividing the area and the seed into the same number of parts will help you spread them evenly. Gently rake to ensure good seed to soil contact.

WATERING

For the best outcome, maintain a consistently damp seedbed for 3 to 4 weeks using a fine spray to prevent seed movement. Avoid letting it dry out as germination will slow.

Lawn Maintenance Guide:

Fertilise twice in
Autumn and twice in
Spring

First mow: When well established at around 40-50mm height. Take off only the tips for the first few mows.
When fully established mow regularly and avoid removing more than one-third of the leaf at a time.

Avoid mowing during the heat of the day in summer to prevent stressing your lawn.
