

# NITRO GREEN IRON BOOST FERTILISER

**Super charge your turf! Use a fertiliser with added iron for a high quality lawn with the dark green colour of Australia's best sports stadiums.**

**N P K Fe**  
**20 : .85 : 2 : 5**

Achieve the dark green colour seen in Australia's best sports stadiums! Nitro Green Iron Boost Fertiliser is super charged with added iron to deliver a high quality lawn. Its formula provides a rapid colour boost, increases root strength, and offers better resistance to disease. Thanks to homogenous granules, you get even nutrient distribution and the fastest uptake of nitrogen by the plant.

**SIZE 5kg**

## How to apply a maintenance fertiliser:

### PREPARE YOUR LAWN

Work out the area of your lawn (length x width). You need 3kgs of fertiliser for 100sqm.

### FERTILISE

Apply the correct amount of fertiliser evenly to a dry lawn. Using Earthway fertiliser spreader is the best method. Apply your Fertiliser in two directions, dividing your fertiliser to ensure even coverage.

### WATER WELL

Fertiliser needs to be watered in soon after application. Use enough water to irrigate the fertiliser prill into the thatch and off the leaf.

### REMOVE EXCESS

Be careful to sweep off all hard surfaces before irrigating as products can stain.

## Application:

<b>Low</b>	1.2kg/100m <sup>2</sup>
<b>Medium</b>	1.8kg/100m <sup>2</sup>
<b>High</b>	2.4kg/100m <sup>2</sup>

## Recommended Use:

Recommended to use on all lawn seed varieties including Ryegrass, Fescue, Bluegrass, Bentgrass, Kikuyu, Couch, Buffalo and Zoysia.

## Lawn Maintenance Guide:

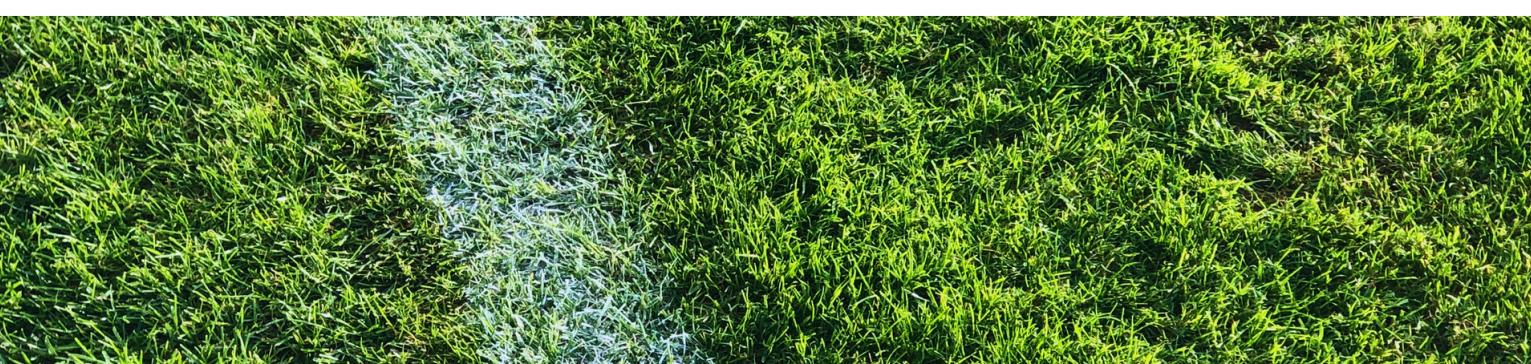

**Fertilise twice in Autumn and twice in Spring**

**Mow regularly and avoid removing more than one third of the leaf at a time.**

**Avoid mowing during the heat of the day in summer to prevent stressing your lawn.**
